

**Speaker:**

**Loranda Miletic**

**Multiperspectivity – Learning about common history from diverse perspective**

Multiperspectivity means providing a variety of sources and different perspectives on a given issue, analyzing how different perspectives relate to each other, and recognizing that each perspective is part of something bigger: a more complex but also a more complete picture.

Learning Objectives:

Determine why a multiperspective approach is important;

Understand the factors that help explain why people attach different meanings to the same historical events.

See how the multiperspective approach can be applied in the classroom.
