

VIRT²UE Project

Virtue based ethics and Integrity of Research: Train-the-Trainer program for Upholding the principles and practices of the European Code of Conduct for Research Integrity

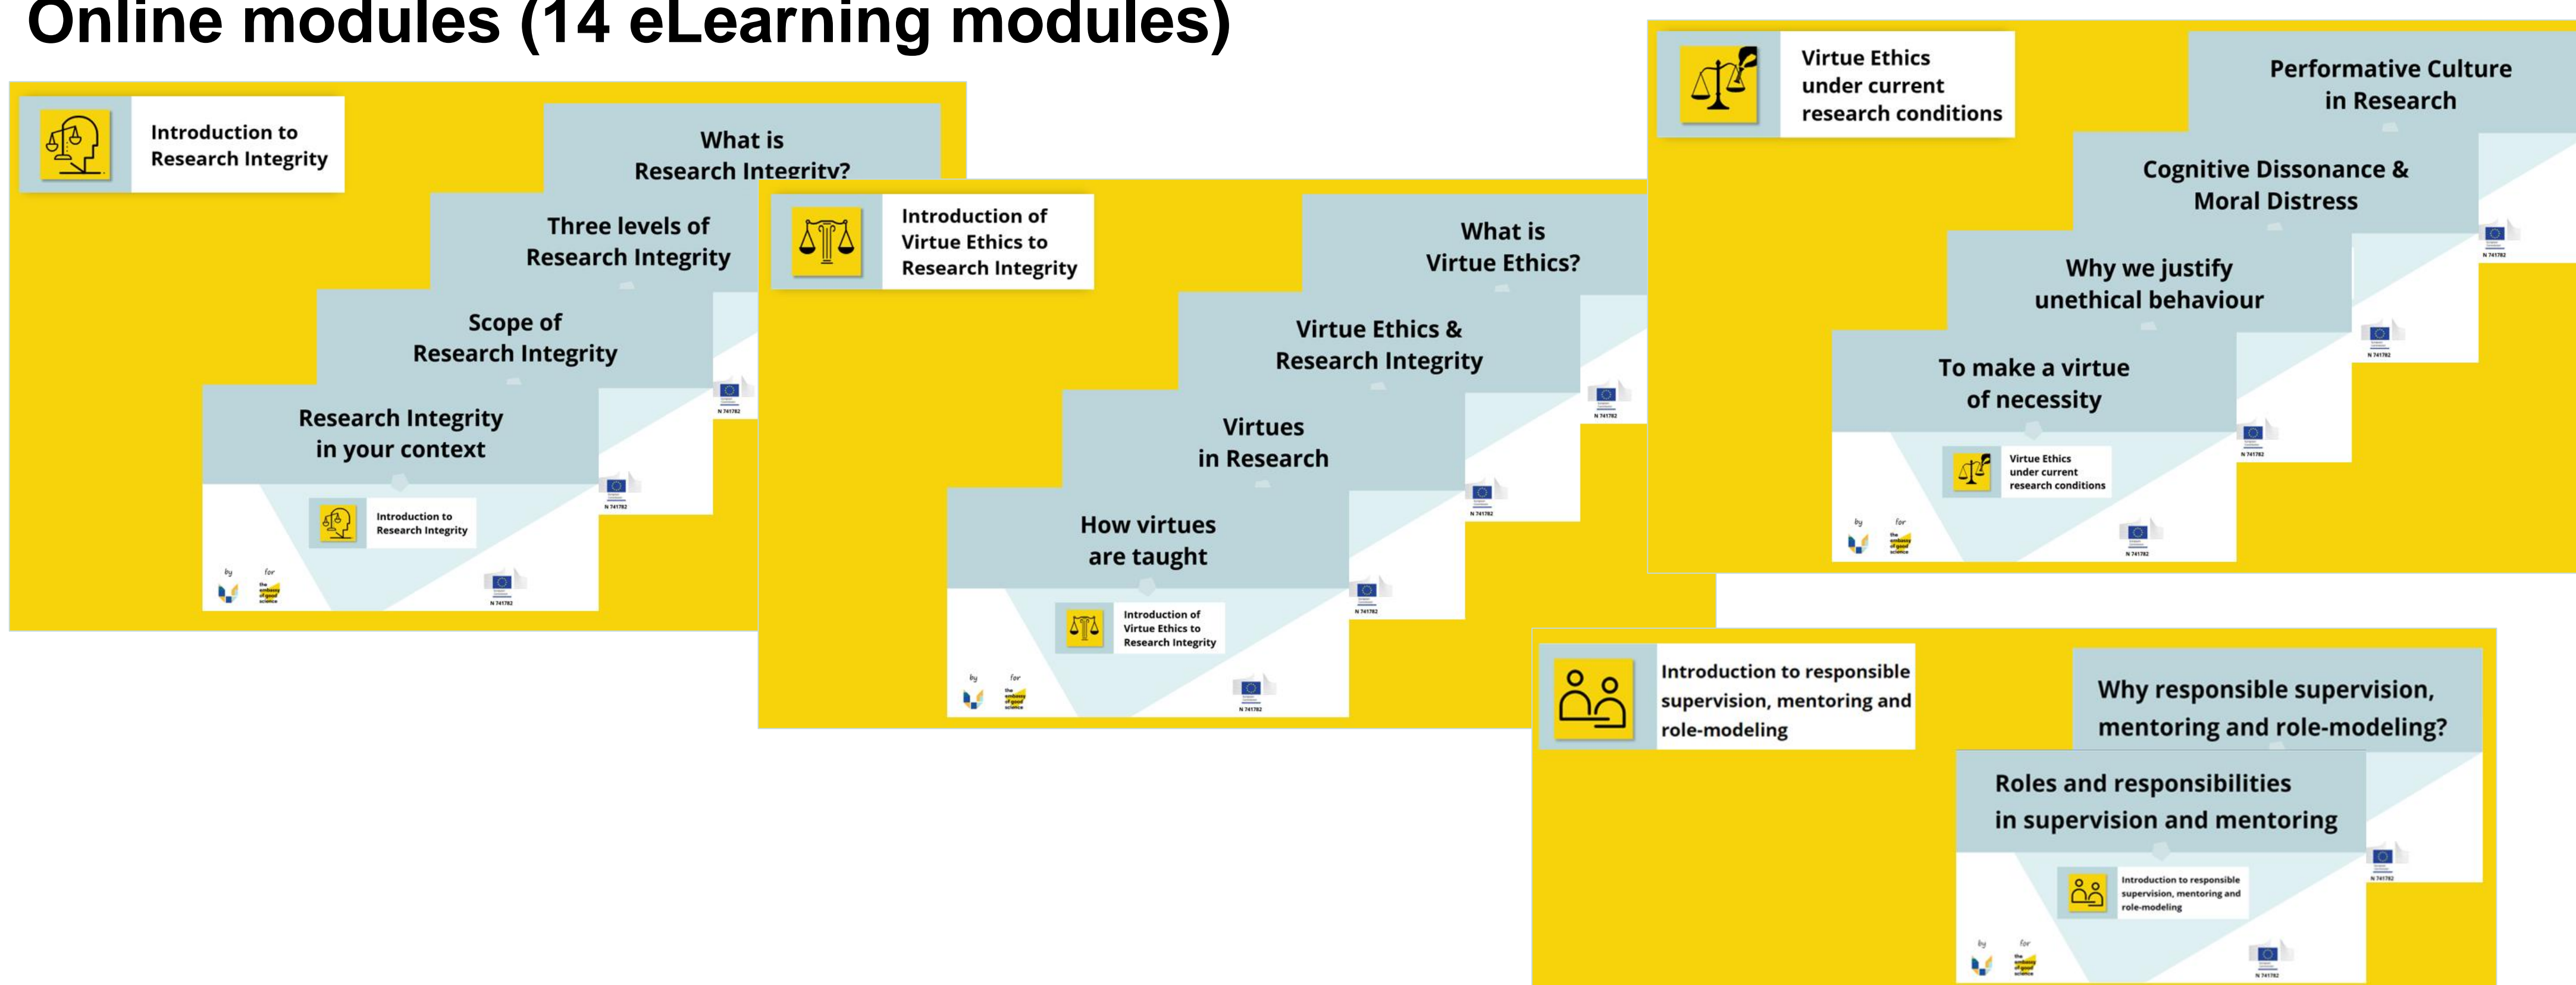

Topic: SwafS-27-2017 - Implementing a European Train-the-trainers initiative with regard to Ethics and Research Integrity

TtT Program characteristics:

1. Virtue ethics
2. Learning by doing
3. Lerner-centered approach

Online modules (14 eLearning modules)

Participatory exercises

Debate and Dialogue:

Aim

To identify the features of debate and dialogue

Relevance

- Sets the tone for the other exercises
- Important for group learning processes
- Important for moral reasoning and ethics education

Modified Rotterdam Dillema Game

Aim

To reflect on alternative courses of action and identify the principles and practice at stake

Relevance

- To create a space to talk about research integrity issues without having to talk about personal cases
- Ice breaker

The Middle Position

Aim

To foster sensitivity for scientific virtues and acknowledge the ambiguity of virtues for guiding action

Relevance

- To foster reflection on acting on virtues in specific situations
- To understand the practical meaning of abstract virtues
- To reflect on moral ambiguities and grey areas

Virtues and Norms

Aim

To identify virtues that would guide actions in real research integrity dilemmas and to describe the course of action that would follow.

Relevance

- To facilitate reflection on personal cases
- To learn through dialogue by sharing personal perspectives

Self-Declaration Approach

Aim

To understand the multidimensional nature of goodness and to reflect on understandings of 'goodness' in research.

Relevance

- Virtuous behaviour linked to 'good' professional functioning
- Sensitizes participants about what it means to do 'good' research and to be a 'good' researcher

Consortium members

Funded by the European Union's Horizon 2020 research programme under Grant Agreement No. 787580.
