

Welcome to the Students and Postdocs meiosis workshop v3.0

Dear Participant,

This is the third version of a workshop we initiated in 2016, which took place in Montpellier in 2016 and 2018, and which content was similar to this virtual meeting. The aim was and is to share and communicate the best science in the field of meiosis presented by students and postdocs.

For obvious reasons, we decided this novel virtual format, and we are very impatient as in the current context, it is time to share, discuss and present ongoing work. We hope this will be inspiring, stimulating for all of us.

We will have 3 keynote talks, 18 talks and 45 posters. We are sorry for those who submitted posters and were not selected, but technical constraints set a limit on the capacity. We have dedicated sessions for questions and discussions, and we hope you will enjoy and appreciate these sessions of interactions.

We thank our sponsors University of Montpellier, CNRS, French Genetic Society, IGH and CBS, and we thank PremC team for the organisation and setting up these novel tools for interactions.

Looking forward to seeing you. We are going to have three exciting days, and stay tuned until the end, not a banquet, but a poster prize session!

Enjoy the workshop!

Bernard de Massy and Thomas Robert
